Multi-Objective and Multi-Attribute Optimisation for Sustainable Development Decision Aiding Samarjit Kar 2019-09-20 Optimization is considered as a decision-making process for getting the most out of available resources for the best attainable results. Many real-world problems are multi-objective or multi-attribute problems that naturally involve several competing objectives that need to be optimized simultaneously, while respecting some constraints or involving selection among feasible discrete alternatives. In this Reprint of the Special Issue, 19 research papers co-authored by 88 researchers from 14 different countries explore aspects of multi-objective or multi-attribute modeling and optimization in crisp or uncertain environments by suggesting multiple-attribute decision-making (MADM) and multi-objective decision-making (MODM) approaches. The papers elaborate upon the approaches of state-of-the-art case studies in selected areas of applications related to sustainable development decision aiding in engineering and management, including construction, transportation, infrastructure development, production, and organization management.

Multi-Objective Combinatorial Optimization Problems and

Solution Methods Mehdi Toloo 2022-02-09 Multi-Objective Combinatorial Optimization Problems and Solution Methods discusses the results of a recent multi-objective combinatorial optimization achievement that considered metaheuristic, mathematical programming, heuristic, hyper heuristic and hybrid approaches. In other words, the book presents various multi-objective combinatorial optimization issues that may benefit from different methods in theory and practice. Combinatorial optimization problems appear in a wide range of applications in operations research, engineering, biological sciences and computer science, hence many optimization approaches have been developed that link the discrete universe to the continuous universe through geometric, analytic and algebraic techniques. This book covers this important topic as computational optimization has become increasingly popular as design optimization and its applications in engineering and industry have become ever more important due to more stringent design requirements in modern engineering practice. Presents a collection of the most up-to-date research, providing a complete overview of multi-objective combinatorial optimization problems and applications Introduces new approaches to handle different engineering and science problems, providing the field with a collection of related research not already covered in the primary literature Demonstrates the

efficiency and power of the various algorithms, problems and solutions, including numerous examples that illustrate concepts and algorithms Science, Values, and Objectivity Peter Machamer 2004 Collection of essays that identify the values crucial to science, distinguish some of the criteria that can be used for value identification, and elaborate the conditions for warranting certain values as necessary or central to scientific research.

Research Methods for Students, Academics and Professionals

Kirsty Williamson 2002-07-01 Research is such an important subject for information professionals that there will always be a need for effective guides to it. Research skills are a prerequisite for those who want to work successfully in information environments, an essential set of tools which enable information workers to become information professionals. This book focuses on producing critical consumers of research. It also goes some way towards producing researchers in the fields of information management and systems. The first edition of this book was enthusiastically received by researchers, students and information professionals in Australia and beyond. Reviews of the first edition considered it a "a worthwhile addition to any information professional's or research student's reference shelf (Archives & Manuscripts). This new edition has an additional chapter on ethics, to address the importance of the ethical implications of research. It also has (as did the first edition) two unique characteristics: it is Australian-focused, distinctive among research texts for information professionals; and it has a multi-disciplinary focus, with its authors being drawn from information management (librarianship, archives and recordkeeping) and information systems. The numerous examples throughout the book are drawn from these multiple disciplines. The first edition of this book was road-tested with students from several disciplines who are studying in several universities. Its Introduction noted that "In research terms, the content have been refereed and found to be authoritative!" To this can be added

the many satisfied users of the first edition.

Handbook on Writing Research Paper in Social Science Using Advance Tools 2022-10-31 The book has well turned out to be a boon for researchers from academia as well as industry. The book seemly meets the requirement and encounters the dilemma of a 'first time researcher' in many ways. The basics of research paper writing are taken

well care in the previous editions of the handbooks as proceedings published by Prestige Institute of Management and research, Gwalior. The previous editions focused on steps to carry out review of literature, setting objectives, developing hypothesis, selecting appropriate methods as per objectives, drawing inferences followed by referencing styles. The book not only provides insights to a first time researcher but also introduces them with the latest tools. Part one of the book presents introduction to E views as Chapter 1. The chapter deals with step wise procedure to work with E views elaborately. E-Views is widely used numerous econometric analyses along with statistical analysis. E views provided analysis like cross-section, time series estimates and forecasts, as well as does panel data analysis simultaneously. Chapter 2 is modestly written to introduce 'Mendeley' to the researcher. 'Mendeley is expedient for copious objectives like conducting systematic literature review, research gap identification, setting objectives thereafter, and more over provides a most vital efficacy to manage research papers in a stress-free manner. 'Mendeley' is widely used amongst researchers across the globe as a referencing tool as well providing competence to incorporate any style of referencing within fraction of seconds. Thus taking research on next level. Part two of the book contains twelve research papers covering diverse domains like finance, marketing, HR and, IT. The research papers are the sample papers exhibiting the concepts of writing a well-structured paper and elaborating the procedures to be followed while writing a research paper. The research papers included in the book are developed during the 'Five Day National Research Methodology Workshop', organized by Prestige Institute of Management and research, Gwalior. The paper writing work was divided into 'before', 'during' and 'after' phases. Topic finalization, measure development, review of literature and data collection was done before the initiation of workshop among the teams of registered participants. The entire methodology, application of data analysis tools and discussion was done during the workshop. Post workshop i.e. the after phase was exclusively dedicated for strengthening the review of literature, discussion of results and, referencing followed by improvement in the

overall structure and language of the research paper. We hope the efforts put in the book will surely help readers

The Corporate Objective Andrew R. Keay 2011-01-01 'This is legal scholarship of the finest kind, concerned with an issue of supreme political, economic and social importance. Professor Keay takes the debate on the object of the modern public corporation by the scruff of its neck and skilfully navigates between the Scylla and Charybdis of the shareholder/stakeholder debate. This book, characterised by admirable analytical clarity and a huge amount of research, faithfully summarises the debate hitherto, and propels us to the next stage with a powerful argument, which challenges, effectively, both the stakeholder and shareholder theories.' - Harry Rajak, University of Sussex School of Law, UK The Corporate Objective addresses a question that has been subject to much debate: what should be the objective of public corporations? It examines the two dominant theories that address this issue, the shareholder primacy and stakeholder theories, and finds that both have serious shortcomings. The book goes on to develop a new theory, called the Entity Maximisation and Sustainability Model. Under this model, directors are to endeavour to increase the overall long-run market value of the corporation as an entity. At the same time as maximising wealth, directors have to ensure that the corporation survives and is able to stay afloat and pursue the development of the corporation's position. Andrew Keay seeks to explain and justify the model and discusses how the model is enforced, how investors fit into the model, how directors are to act and how profits are to be allocated. Analysing in depth the existing theories which seek to explain the corporate objective, this book will appeal to academics in corporate law and corporate governance as well as law, finance, business ethics, organisational behaviour, management, economics, accounting and sociology. Postgraduate students in corporate law and corporate governance, directors, and government regulators will also find much to interest them in this study.

Multi-Objective Memetic Algorithms Chi-Keong Goh 2009-02-26 The application of sophisticated evolutionary computing approaches for solving complex problems with multiple conflicting objectives in science and engineering have increased steadily in the recent years. Within this growing trend, Memetic algorithms are, perhaps, one of the most successful stories, having demonstrated better efficacy in dealing with multi-objective problems as compared to its conventional counterparts. Nonetheless, researchers are only beginning to realize the vast potential of multi-objective Memetic algorithm and there remain many open topics in its design. This book presents a very first comprehensive collection of works, written by leading researchers in the field, and reflects the current state-of-the-art in the theory and practice of multi-objective Memetic algorithms. "Multi-Objective Memetic algorithms" is organized for a wide readership and will be a valuable reference for engineers, researchers, senior undergraduates and graduate students who are interested in the areas of Memetic algorithms and multi-objective optimization.
