The Secret Handbook of the Blue Circle Antonis Papatheodoulou 2019-12-15 Concept Development and Scientific Editing: Despo Fatta-Kassinou The book was inspired by the scientific work carried out by the research group of Nireas International Water Research Center (Nireas-IWRC) at the University of Cyprus in the field of wastewater treatment and reuse. The work is led by Dr. Despo Fatta-Kassinou, who is an Associate Professor at the Department of Civil and Environmental Engineering and Director of Nireas-IWRC. The group worked together with Antonis Papatheodoulou, one of the Greece's best children's storytellers, and developed an interesting educational adventure through which children can understand the vital role of water in life. There is increasing recognition of the power of children's early thinking and learning, as well as a belief that science may be of particular importance in early childhood, contributing not only to the future scientific understanding of children, but also to building important skills and attitudes for learning, establishing high levels of scientific literacy and strengthening scientific inquiry. Educating the young generation and increasing awareness on various aspects of the water cycle and wastewater reuse was the motivation for the development of 'The Secret

Handbook of the Blue Circle'. Six Water Scientists, who are defenders and protectors of the most important substance on the planet (i.e. water), Dr. Tom Atom, Dr. Celia Circle, Dr. Scot Water, Dr. Glow McCrystal, General Claire Clean and Dr. André Antib, are looking for helpers to become new members of their 'Eternal Blue Circle Society'. The eight Secret Chapters of the book, include among others: knowledge on what water is, its chemical structure and properties, its cycle, its uses and its significance, water scarcity, a historical retrospective of a city's water supply from antiquity to date, the typical treatment processes applied for the production of drinking water, the water pollution caused by traditional pollutants and contaminants of emerging concern, the processes applied in wastewater treatment plants, and the presence of such contaminants in the environment. The mission of the members of the 'Eternal Blue Circle Society' is to carefully study contaminants of emerging concern and protect water and nature. Suitable for children of six years and upwards, the book also outlines simple ways in which the children can contribute to the protection of water quantity and quality and raise awareness on the topic themselves.

The Slaves Frederick Douglass 2016-12-16 "The Slaves" is nothing but Frederick Douglass's groundbreaking autobiography and his first book "Narrative of the Life of Frederick Douglass, An American Slave, written by Himself". We have renamed the title here as "The Slaves" to keep the title short as well as to establish that Frederick Douglass is no longer a name of a particular slave born in nineteenth-century America, but a name that represents slaves of the entire world and of all time. Even though, we do not wish anyone to be born into slavery anymore like Frederick was, we have taken him as a symbol of all the slaves as a wish that all who are still in slavery may have the spirit of Frederick Douglass and fight their ways to the freedom and work to free other slaves to make the slavery history. The life of Frederick, is in one way or another, is the lives of all other slaves. Hence, we have named this version of his book "The Slaves".

Drug Dealer, MD Anna Lembke 2016-11-15 The disturbing connection between well-meaning physicians and the prescription drug epidemic. Three out of four people addicted to heroin probably started on a prescription opioid, according to the director of the Centers for Disease Control and Prevention. In the United States alone, 16,000 people die each year as a result of prescription opioid overdose. But perhaps the most frightening aspect of the prescription drug epidemic is that it's built on well-meaning doctors treating patients with real problems. In Drug Dealer, MD, Dr. Anna Lembke uncovers the unseen forces driving opioid addiction nationwide. Combining case studies from her own practice with vital statistics drawn from public policy, cultural anthropology, and neuroscience, she explores the complex relationship between doctors and patients, the science of addiction, and the barriers to successfully addressing drug dependence and addiction. Even when addiction is recognized by doctors and their patients, she argues, many doctors don't know how to treat it, connections to treatment are lacking, and insurance companies won't pay for rehab. Full of extensive interviews—with health care providers, pharmacists, social workers, hospital administrators, insurance company executives, journalists, economists, advocates, and patients and their families—Drug Dealer, MD, is for anyone whose life has been touched in some way by addiction to prescription drugs. Dr. Lembke gives voice to the millions of Americans struggling with prescription drugs while singling out the real culprits behind the rise in opioid addiction: cultural narratives that promote pills as quick fixes, pharmaceutical corporations in cahoots with organized medicine, and a new medical bureaucracy focused on the bottom line that favors pills, procedures, and patient satisfaction over wellness. Dr. Lembke concludes that the prescription drug epidemic is a symptom of a faltering health care system, the solution for which lies in rethinking how health care is delivered.
