Radionics & The Subtle Anatomy Of Man David V

Tansley 2011-05-31 Radionics is defined as a method of diagnosis and therapy which is primarily concerned with the utilization of subtle force fields and energies, for the purpose of investigating and combating the causes of disease which ravage humanity and the other kingdoms of nature. But in examining the history and development of radionics from the pioneering work of Dr Albert Abrams and Ruth Drown to the latest experimental work at the de la Warr Laboratories, David Tansley discovered a curious paradox. In literature on the subject, and in the rare books which provide the very core of radionic therapeutic measures, there are plenty of references to man's physical organic systems, but little

regarding the probability of underlying force fields which might govern and determine the health of the physical form. This book represents an informed endeavour to redress the balance by providing a simple yet practical outline of the subtle anatomy of man. The theory is not new: Abrams diagnosed at a distance, and Drown treated absent patients. David Tansley believes that the time is ripe for radionics to bear witness to an energy field of a more subtle nature: that is, in fact, its innate purpose.

Rehabilitation in Cancer Care

Jane Rankin 2009-03-16

Rehabilitation in Cancer Care is an essential clinical resource for all Allied Health

Professionals working within or entering this specialist area. It provides practical guidance for the rehabilitation of people with cancer or those receiving palliative care. As well as explaining the key skills required at every stage of the cancer journey, the book specifically offers advice on diagnosis, treatment, management and effective

interventions. Furthermore the role of each member of the interdisciplinary team is clearly explained at each stage, as is the importance of teamwork and holistic care. Section 1 introduces the reader to the rationale for the rehabilitation of people with cancer or those receiving palliative care, Section 2 looks at the multi-professional management of common cancers and Section 3 looks at symptom management.

Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Breast Cancer Victoria Harmer 2003 This comprehensive book is for all nurses and other health professionals involved in the care of people with breast cancer and covers all aspects of the subject. It gives sound evidence-based information and advice on the nursing care for each stage of the patient's journey. Each chapter is written by an expert in the field and topics include the anatomy of the breast, all available treatments, complementary therapies, the psychological care of both patients and their families, and the role of the specialist nurse. With breast cancer increasing as the population ages, this book provides a well-balanced approach to all aspects of managing malignancy. The importance of writing from a nursing perspective is underlined so that the essence of support and bedside care is not missed.

Radionics Interface With The Ether-Fields David V Tansley 2011-08-31 This book explores the interface that exists between the human energy field and the Universal Field of energy in which we live. It shows how these fields

can be utilised for distant diagnosis and treatment. It also illustrates that the surest and most effective way to ameliorate a defect in any biological system, is to modulate the interacting and interdependent energy fields by way of the chakras. The same energy fields can be used to take photographs of distant objects, particularly the energy structures of living human tissues and pathological states existing in them. The vibratory patterns and potencies of homoeopathic remedies can also be drawn from the ether-fields and impregnated into neutral substances such as water or alcohol solutions which have a capacity for memory. Radionics is a healing art that links the physical world with the unseen worlds lying beyond the physical senses. Diagnostically it probes to the levels of causation of disease; therapeutically it is gentle and non-invasive.
