Group 2013-09-04 The Rainbow Nation benefits
from an internationally competitive private
sector, which accounts for roughly 70% of GDP,
and extremely competitive infrastructure; its
utility sector, for example, produces just under

half of the total power generated on the African
continent. South Africa represents by far the
most developed market in Africa, but there are
still some structural challenges it is grappling
with. Government strategies have set a target of
increasing labour market participation from 54%
in 2010 to 65% by 2030, bringing the number of
workers in the formal sector to 25.3m people
and lowering unemployment from 25% to 6%.
While its fiscal space is narrow, long-term
investments in infrastructure, education and
health are expected to be key to attaining its
growth potential. Recent years have seen both
the public and private sectors look to strengthen
regulatory frameworks in mining and industry -
in some cases, like the automotive sector, with
impressive results.
