TIP 35: Enhancing Motivation for Change in Substance Use

Disorder Treatment (Updated 2019) U.S. Department of Health and Human Services 2019-11-19 Motivation is key to substance use behavior change. Counselors can support clients' movement toward positive changes in their substance use by identifying and enhancing motivation that already exists. Motivational approaches are based on the principles of person-centered counseling. Counselors' use of empathy, not authority and power, is key to enhancing clients' motivation to change. Clients are experts in their own recovery from SUDs. Counselors should engage them in collaborative partnerships. Ambivalence about change is normal. Resistance to change is an expression of ambivalence about change, not a client trait or characteristic. Confrontational approaches increase client resistance and discord in the counseling relationship. Motivational approaches explore ambivalence in a nonjudgmental and compassionate way.

Food Safety Culture Frank Yiannas 2008-12-10 Food safety awareness is

at an all time high, new and emerging threats to the food supply are being recognized, and consumers are eating more and more meals prepared outside of the home. Accordingly, retail and foodservice establishments, as well as food producers at all levels of the food production chain, have a growing responsibility to ensure that proper food safety and sanitation practices are followed, thereby, safeguarding the health of their guests and customers. Achieving food safety success in this changing environment requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of organizational culture and the human dimensions of food safety. To improve the food safety performance of a retail or foodservice establishment, an organization with thousands of employees, or a local community, you must change the way people do things. You must change their behavior. In fact, simply put, food safety equals behavior. When viewed from these lenses, one of the most common contributing causes of food borne disease is unsafe behavior (such as improper hand washing, cross-contamination, or undercooking food). Thus, to improve food safety, we need to better integrate food science with behavioral science and use a systems-based approach to managing food safety risk. The importance of organizational culture, human behavior, and systems thinking is well documented in the occupational safety and health fields. However, significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety.

The G.R.E.A.T. Retail Sales & Service Workbook Gerard Assey 2021-08-23 If you are in retail, then this book is a MUST! Uniquely designed to help transform you into a Master Retail Sales & Service Professional by helping you discover the secrets that drive the world's top retail sales professionals, it will help you or your team create the habits and lasting changes by enabling you replace current unacceptable patterns that are costing your company sales with new ones, enabling you achieve your sales goals faster and more consistently. Unlike the traditional hard sell approach where you are constantly 'pushing' the customer to close right from the start- thus making the customer feel uncomfortable, manipulated or threatened, with the G.R.E.A.T. Sales Model, the salesperson takes time up front to build a sincere, committed relationship by investing time in learning about the customer's needs. This helps build trust between the two. Then, every step of the sales process that follows is conducted with the relationship in mind, ensuring an enduring and lasting relationship, leading to repeat business and referrals. The G.R.E.A.T. Sales Model helps you in many ways: It first of all instills in you that only great service stands out. It gives you a structured approach to handling your customers which is an acronym for

our 5 step powerful sales model- the key to successful retail selling: G- Greet customers R-Revealing questions-Understanding needs E-Explain, enlighten, engage, enthuse, excite, customers about your product A- Answer customer's concerns and objections T-Techniques to help customers 'buy'...as people, hate being sold! (Selling to the opposite sex, Generating additional sales, Suggesting complementary/ Add-on products- Up-selling/ Cross-selling) With this powerful model, most of your time is 'invested' in uncovering the customer's needs and proving value of your product, before you actually recommend it, thus eliminating many objections. The G.R.E.A.T. Retail Sales & Service Workbook will provide you a step by step approach into professionalism where you will gain a full understanding of the psychology of both the buying and selling processes, working through these 5 steps, practicing and mastering the skills at each stage, so that they are developed and reinforced, thus enabling you 'win, provide a positive experience and keep customers for life'!

Federal Guidelines for Opioid Treatment Programs U.S. Department of Health and Human Services 2019-11-23 The Federal Guidelines for Opioid Treatment Programs (Guidelines) describe the Substance Abuse and Mental Health Services Administration's (SAMHSA) expectation of how the federal opioid treatment standards found in Title 42 of the Code of Federal Regulations Part 8 (42 CFR 8) are to be satisfied by opioid treatment programs (OTPs). Under these federal regulations, OTPs are required to have current valid accreditation status, SAMHSA

certification, and Drug Enforcement Administration (DEA) registration before they are able to administer or dispense opioid drugs for the treatment of opioid addiction.

CookSafe Food Standards Agency 2007-03 This manual contains guidance on food safety standards for the catering industry, developed by the Scottish HACCP Working Group of the Scottish Food Enforcement Liaison Committee on behalf of the Food Standards Agency Scotland. The guidance builds on existing good practice and takes account of the requirements of European food safety legislation which requires that all food businesses apply food safety management procedures based on 'Hazard Analysis and Critical Control Point' (HACCP) principles.

SPIN® -Selling Neil Rackham 2020-04-28 True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.

Armstrong's Essential Human Resource Management Practice Michael Armstrong 2010-06-03 Armstrong's Essential Human Resource Management Practice provides a complete overview of the practices and processes fundamental to managing people. The text provides a thorough introduction to the core areas of HR including: people resourcing, performance management, learning and development and rewarding people. It also examines the contribution of HR to organizational aims and objectives and how it is integrated within the business. The book is accompanied by online resources for both lecturers and students and adopts an increased focus on employee engagement, a concept which is

becoming increasingly prominent in people management, but which is often presented as a mantra without being properly understood; this is examined in detail with reference to recent research. Michael Armstrong's original Handbook of Human Resource Management is the classic text for all those studying HR or who are entering the profession for the first time. In this new title Michael Armstrong provides a condensed text which has been rewritten with the non-HR student or professional in mind, describing and evaluating key HRM concepts such as: HRM itself; strategic HRM; the resource-based view; the choice between best practice and best fit; human capital measurement; motivation theory; emotional intelligence; the flexible firm; the learning organization; and financial rewards. Online supporting resources for this book include lecture slides, an instructor's manual, case examples and a literature review.

Set-up-to-Fail Syndrome Jean-Francois Manzoni 2007-02-01 Do you have an employee whose performance keeps deteriorating—despite your close monitoring? Brace yourself: You may be at fault—by unknowingly triggering the set-up-to-fail syndrome. Perhaps things started off swimmingly. But then something—a missed deadline, a lost client—made you question the person's performance. You began micromanaging him. Suspecting your reduced confidence, he started doubting himself—and stopped giving his best. You viewed his new behavior as additional proof of mediocrity, and tightened the screws further. In *The Set-Up-to-Fail Syndrome*, Jean-Francois Manzoni and Jean-Louis Barsoux show how this insidious cycle hurts everyone: employees stop volunteering ideas, preventing your organization from getting the most from them; you lose energy to attend to other activities; and your reputation suffers as other employees deem you unfair. Team spirit wilts as targeted performers are alienated. But the set-up-to-fail syndrome doesn't have to happen. The authors provide preventive measures, such as loosening the reins as new employees master their jobs. If the syndrome has already erupted, Manzoni and Barsoux explain how to discuss the dynamic with your employee and reverse the cycle.
