A More Perfect Union [kit].: A more perfect union : teachers edition 1991
Good Toys, Bad Toys Andrew McClary 2015-02-18 In early America, most children had only a few toys and parents received advice from family and friends on the best ways to make and use toys. By the early 1900s the Industrial Revolution was producing a new world of toys and giving more parents the wealth to buy them. Mass media also sang the praises of these new factory-made, store-bought toys, but that began to change as early as the mid-1900s when the mass media was used to inform parents of the many dangers of children's toys. Many encourage violence, sexism, racism, and some are actually unsafe and unhealthy. The development of children's toys from early America to the present time and the shifting opinions of them expressed by parents and the mass media throughout this time are the main subjects of this book. The first section discusses the many problems with toys, while the second puts these problems in historical perspective. How have these problems changed, and are still changing today? Might today's toys be about to enter a time when they will be better than ever? The third section argues that many media toy watchers are biased toward the negative, giving toys more of a black eye than they deserve, and considers the challenges that face today's parents as they try to choose the best toys for their children.

Teaching World History in the Twenty-first Century: A Resource Book Heidi Roupp 2015-02-12 This practical handbook is designed to help anyone who is preparing to teach a world history course - or wants to teach it better. It includes contributions by experienced teachers who are reshaping world history education, and features new approaches to the subject as well as classroom-tested practices that have markedly improved world history teaching.

Funds of Knowledge and Identity Pedagogies for Social Justice

Moisés Esteban-Guitart 2023-07-21 This edited volume takes the US-derived concept and praxis of funds of knowledge and applies it globally to critically analyse current education in line with social justice, antiracism, and culturally sustaining pedagogies. Edited by one of the premier international voices for the funds of knowledge approach, and in particular funds of identity theory, chapters foreground first-hand, participatory, research-practice experiences with learners, schools, and local communities. These experiences demonstrate the positive, social-justice inspired pedagogical actions that result in, and reveal, powerful possibilities for a decolonialised, antiracist praxis that aims to eradicate deficit thinking in education. Further, the inclusion of voices that are typically "othered" in the construction and distribution of academic knowledge make this a seminal volume in the field. Ultimately, the volume will be of interest to scholars, students, and researchers working in the sociology of education, psychology of education, and those specifically dealing with antiracism, decolonialism, and equity within education.

Educating the Student Body Committee on Physical Activity and Physical Education in the School Environment 2013-11-13 Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have

resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.
