Sterling Test Prep SAT World History Sterling Test Prep 2019-01-14 This book provides a thorough and curriculum-oriented review

structured to match the College Board's most current SAT World History test content outline. The content is divided into four historical periods and is centered on seven geographic focus areas: Europe, Africa, Southwest Asia, South and Southeast Asia, East Asia, the Americas, as well as a global comparative overview. The information is presented in a clear and easy to understand style. You can study one focus area within one historical period at a time to fully comprehend and internalize important historical relationships. Since many questions on the SAT World History Subject Test do not require simple fact recall, but rather aim to assess your overall, wider understanding of the subject, the content of this preparation book is context-based. A context-based approach to studying World History is more engaging than a raw fact-based approach and is necessary for successful test preparation. By using this book as the review guide during studying for the test, you will develop the necessary skills and will be

well prepared for the SAT World History Subject Test. The content of this book is developed and edited by highly qualified history teachers, scholars and education specialists with an emphasis on the outline and skills released by the College Board for the SAT World History Subject Test. It was examined for quality and consistency by our team of editors who are experts on teaching and preparing students for standardized tests.

Ace the GMAT Brandon Royal 2016-01-01 ACE THE GMAT is based on a simple but powerful observation: Test-takers who score high on the GMAT exam do so primarily by understanding how to solve a finite number of the most important, recurring problems that appear on

the GMAT. What are these important, recurring problems? The answer to this question is the basis of this book. This manual provides in-depth analysis of over 200 all-star problems that are key to mastering the seven major GMAT problem types including Problem Solving, Data Sufficiency, Sentence Correction, Critical Reasoning, Reading Comprehension, Analytical Writing, and Integrated Reasoning. Apart from providing readers with answers and full explanations, a special feature of this book is that each problem is categorized by type ("classification"), rated by difficulty level ("chili rating"), and supplemented with a problem-solving strategy ("snapshot"). "Chance favors the prepared mind." Whether you're a candidate already enrolled in a test-prep course or are undertaking self-study, this guidebook will serve as a rigorous skill-building study guide to help you conquer the math, verbal, analytical writing, and integrated reasoning sections of the exam. Studying for the math and verbal sections of the

GMAT exam requires some 100 hours of study time. This book's content is conveniently divided into topics, which require two to three hours of study time per day. Total study time will vary between 80 to 120 hours for the entire 40 days. Solving (Official exam instructions for Problem Solving, Strategies and approaches, Review of basic math, Multiple-choice problems, Answers and explanations); Chapter 3 - Data Sufficiency (Official exam instructions for Data Sufficiency, Strategies and approaches, How are answers chosen in Data Sufficiency? for English language education grows in Asia, there has been a parallel growth in the development and implementation of standardized tests at the local level.
